## Power & Thermal Measurements

Steady-state electrical and thermal performance under rated load. Results expressed as worst-case across the test cohort.

### Power Output

Power output measured: **5.0V  $\pm$ 0.4% under load**

### Thermal Performance

Thermal dissipation observed: **< 1.5W at rated current**

### Environmental

Temperature qualification verified: **-55°C to +125°C**

## Radiation & Regulatory

Total Ionizing Dose (TID) qualification per MIL-STD-883 Method 1019 and regulatory classification confirmation per export-control review.

### TID Results

Radiation tolerance (TID): **TID > 100 krad(Si)**

### Regulatory & Export

ITAR classification confirmation: **Category XV, §121.1**
