

Radiation & Reliability Qualification

Single Event Latch-up (SEL) immunity per JEDEC JESD57 + extended burn-in qualification per MIL-STD-883 Method 1015. Results extend the Datasheet's baseline qualification claims with bench-measured supplementary evidence.

SEL Immunity

Single Event Latch-up immunity: **> 75 MeV·cm²/mg LET threshold**

Burn-in Qualification

Burn-in qualification: **168 hours at 125°C · 0/100 failures**
