

PRM-3A IC Datasheet

Placeholder document — generated for prototype demo

Buck-converter IC qualified for use in MicroCo's PRM-3A power regulation module. Operating voltage range 6V-36V; output 3.3V at 3A continuous; conversion efficiency at full load $\geq 92\%$; radiation tolerance TID > 75 krad(Si).

This is a placeholder document generated for prototype demo purposes. Real datasheets would carry full electrical, mechanical, and qualification information.
