

Specifications

Electrical and environmental performance specifications for the PRM-3A under the documented operating envelope. All values quoted at nominal supply unless otherwise indicated.

Electrical Performance

Power output stability:	3.3V ±0.5% under load
Interface voltage:	3.3V LVCMOS

Mechanical / Packaging

Package type:	CQFP-128 (ceramic quad flat pack)
Lead count:	128 pins

Environmental

Operating temperature range:	-55°C to +125°C
------------------------------	-----------------

Compliance & System Integration

Regulatory classification and integration parameters required for incorporation into hosted-payload systems.

Regulatory & Export

ITAR classification:

Category XV, §121.1

System Integration

Compatible with Sentinel-4 bus:

Yes (verified per SI-4-IF-12)
