

Specifications

Electrical and environmental performance for the VReg-12C under the documented operating envelope.

Electrical Performance

Power output stability: **5.0V $\pm$ 0.5% under load**

Thermal dissipation (rated load): **< 1.7W at rated current**

Environmental

Operating temperature range: **-55°C to +125°C**

Compliance & Qualification

Regulatory classification and qualification status for incorporation into mission-class systems.

Regulatory & Export

ITAR classification:

Category XV, §121.1

Radiation Qualification

Radiation tolerance (TID):

TID ~ 80 krad(Si)
